^{*}Once every three years

This Calendar was designed with the Year 603AR in mind but it can be easily changed (or not) to suite your Campaign. Some things are a little off, such as the Phase of Artis in Shroudfest, Although this can be worked around by saying Artis is dark even though it's full. Remember Artis isn't viewable for half of its cycle anyway.

Another thing worth noting is that there are 28 different moon cycle images, so look carefully before declaring a full (or any phase) moon to the party members.

Note the Longest Night is spread over three days. The two dates shown, on the first and last day of the year, sandwich the extra day added every three years.

This was originally intended for my personal campaign, feel free to use and distribute it freely. But please do not pass it off as your own work, if you do, make sure your windows and doors are tightly bolted come Tempen 28^{th} .

tj -x-

I wish in no-way to infringe upon the copyright of Privateer Press. All the names are from within the Iron Kingdoms setting and are by no-means my own, and I take no credit for anything other than collating them in this calendar, and having a ***** of a time working out the phases for the off-kilter, elliptical orbits of their moons!

Tom Jensen (Privateer Press boards - tomxj)

^{**} Firelight Jubilee is a three day festival
